

The weather's getting weirder

Devastating wildfires are
much more common now

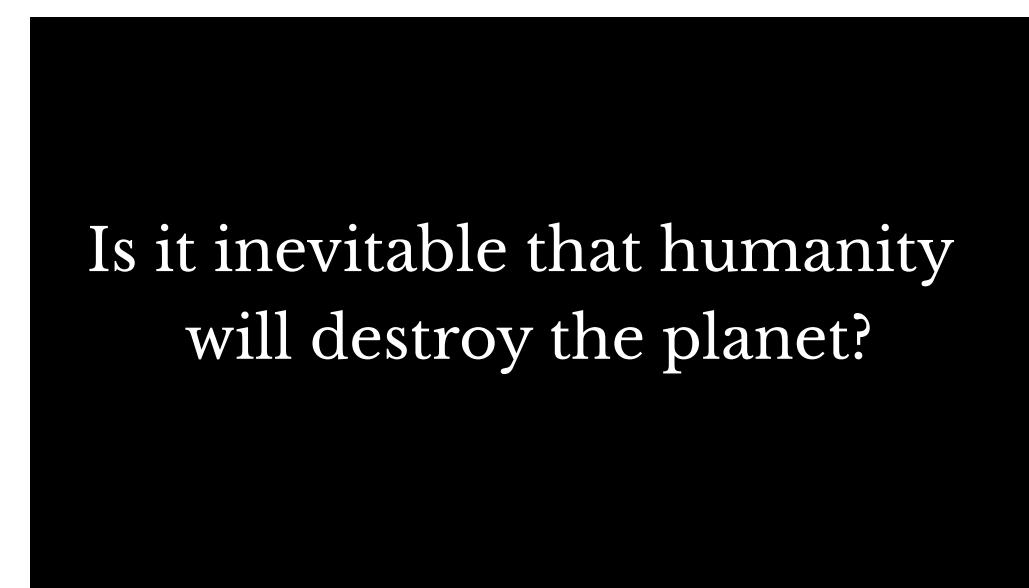

There was a tornado
in December

There was a hurricane
in September

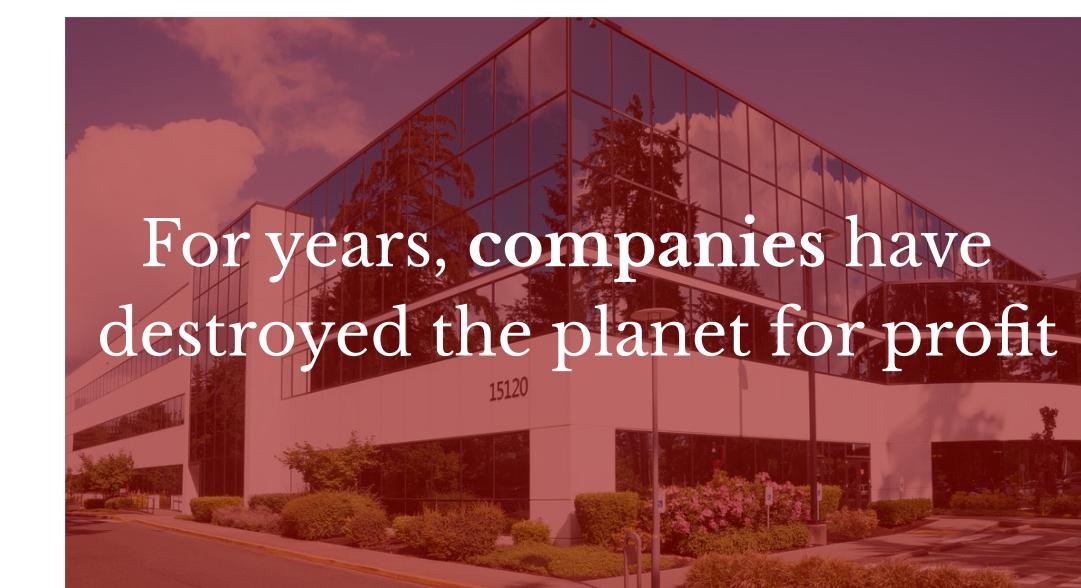

Is it natural?

Is it inevitable that humanity
will destroy the planet?

No

For years, companies have
destroyed the planet for profit

But we can stop them

If we join forces,
nothing can stop us

The black outline is there to show the boundaries of
the frame; it is not part of the video.
